## REPORT OF THE SUPERINTENDENT OF SCHOOLS

---

To the Board of Education and Citizens of Atkinson:

I hereby submit my first Annual Report. This report will include supplementary staff reports from the Supervisor of Music Instruction, the Supervisor of Art Instruction, and the Director of Health Services. The report will cover statistical information concerning the school year beginning July 1, 1946, and ending June 30, 1947, with additional information concerning the status of the schools from July 1, 1947 to Dec. 31, 1947.

### I. GENERAL INFORMATION

The total school enrollment reached an all time high of sixty-six pupils registered, for 1946-47. During the school year 1947-48 the trend is upward with a record September enrollment of 68.

We have been very fortunate to hold our teaching staff which by-and-large measures favorably with those of other schools in New Hampshire and neighboring Massachusetts. Miss Dorothea Martin, a graduate of Massachusetts School of Art, and with two years experience in the Hampton and the Durham schools, was added to the staff as Supervisor of Art Instruction.

### II. CURRICULUM

A. I have found the curriculum followed at the Atkinson Schools to be sufficient, and if followed, should assure reasonable proficiency in the 3 R's, and adequate preparation for those who will go on to the secondary school. An integrated program of health and science is offered, as well as opportunities to develop good citizenship habits and social responsibilities.

B. Audio-Visual Education: An effort is being made to enlarge upon the use of the comparatively new aids to teaching and learning, the sound motion picture, records, and still panorama.

When money and personnel are available, much more should be done in this area.

C. Testing Program: A minimum testing program is in operation in which each pupil during his school tenure is tested to determine "his ability to learn from books" and paralleling this, achievement tests are given in Grades Four to Eight inclusive, to determine how far he has gone in "his learning from books." These test results are used in part as "starting points" from which the teacher may aid the pupils in overcoming their subject difficulties.

### III. TEACHERS AND PROFESSIONAL ADVANCEMENT

Atkinson is fortunate in having a staff of well trained teachers, interested in boys and girls and conscious of the need for continuous study in our dynamic society. During this school year a Citizenship Workshop for teachers was organized. Under the direction of the State Board of Education, the teachers and Superintendent met for three days discussing new trends in education, working on personal teaching problems, and examining new materials for use in our classrooms. To follow this program of professional improvement, a three-week summer school for in-service training of teachers is anticipated. Mrs. Olsen attended summer school on a graduate level at Boston University during the summer session this last year.

### IV. SCHOOL AND COMMUNITY ACTIVITIES

We are fortunate to find such a close liaison between the school and the community. Through the efforts of an active Parent-Teacher Association plans are being made looking toward the establishment of a modified Hot Lunch Program for the next year. At the present time, milk is being offered to the children in the elementary grades.

### V. RECOMMENDATIONS AND CONCLUSIONS:

This section of the report might well be called "A Plan For the Future". In no way should it be implied that these recommendations are "musts", but merely a program upon which you the public must decide.

A. Teacher Status: In order to maintain our present staff of efficient teachers, and secure adequate replacements, salary increases seem necessary. The unending rise in the cost of living throughout the nation makes this of paramount importance. With the enrollments up, and it seems that the trend will continue, an additional teacher for the elementary staff should be contemplated. Some definite steps should be taken to care for the needs of our young people in guidance, physical education and remedial help. When the plans for the new building are realized, it will be necessary to obtain an additional teacher to relieve the untenable load carried by our present teaching staff.

B. Music: We are fortunate to have such an effective program in Music Instruction. During this year an operetta was offered by this department, and the pupils from grades seven and eight, participated in the program sponsored by the Academy.

C. Health and Physical Education: When space and funds are available, and with the help of local organizations, there should be established annual dental clinics and a program of physical examinations.

When funds and adequate facilities become available, an expanded Hot Lunch Program should be instituted using Federal Funds, which are available to defray part of the cost.

D. Textbooks and Scholars' Supplies: During the War Period it was impossible to carry out an efficient policy on textbook adoption and replacement. As a result, many of our texts are overworn, outdated, or inadequate. I therefore recommend a revolving policy of textbook replacement so that in no one year unusual amounts need be spent in this category.

Along with the other commodities, the price index of books, paper, etc., has increased from 10% to 25% over last year, making it necessary to increase the appropriations in these areas.

E. Planning for the Future:

1. While there are different points of view concerning the early growth of school attendance, all observers are agreed that by 1950 in the United States, we shall have a record enrollment, particularly in the elementary schools. The following is the projected enrollment increase in our schools based on statistics compiled by the Metropolitan Life Insurance Company. This projection assumes that Atkinson will follow the national trend.

Estimate of School-Age Population in Atkinson  
from 1946 to 1955

Year	No. of Children Between 6-13
1946	66
1947	71
1948	73
1949	75
1950	77
1951	80
1952	83
1953	86
1954	87
1955	88

It is evident that there will be, in the near future, a marked increase in the school-age population, and the situation urgently calls for planning along practical lines in order that adequate provision be made for the education of these children.

2. Plans have been in operation for the building of a new structure to serve the needs of the elementary school children in Atkinson. It is hoped that it will be possible to begin the building in the early Spring, making it possible to enter the school in September. I wish to commend the School Board for its forethought and vision in planning a structure that will serve not only the school, but the whole community.

F. Conclusion: I wish to take this opportunity to express admiration and respect for our former Superintendent, Mr. William J. Nelson, who through twenty-three years of earnest and upright administration has made teachers, boys and girls, men and women better because of his untiring efforts for progress.

I also wish to express my sincere appreciation for the unqualified cooperation of the teaching staff and for the guidance and ever ready aid of the School Board, and Community organizations. It is only by this team spirit that the needs of all the children of all the people of Atkinson can be realized.

Respectfully submitted,

L. MUNRO GRANDY,

*Superintendent of Schools.*

## REPORT OF SUPERVISOR OF MUSIC

---

To Mr. Munro L. Grandy, Superintendent of Schools:

I am pleased to present the following report of my work as Supervisor of Music.

In working to accomplish the aims of music, which include all the aims and objectives of general education, I presented a graded program in the schools.

The program consisted of rote-singing, basic fundamentals of music theory, expressions of symbols, signs and their significance as applied to the composition in question.

"A singing child is a happy child"—a love to sing and a means of expression, of rejoicing, of praying and of playing and relaxing.

Musical Appreciation, including the study of the Symphony Orchestra has been an interesting phase of the program. The addition of a new record-player and several albums of new records has been a help in carrying on this part of the program.

The Academy students assisted by grades seven and eight presented the operetta, "The Sunbonnet Girl", on December 12. The operetta was well received and a success financially.

In closing I should like to thank Mr. Grandy, the School Committee and Teachers for their kind assistance in 1947.

Respectfully submitted,

EVA W. THOMPSON.

## ANNUAL REPORT OF THE SUPERVISOR OF ART INSTRUCTION

---

To Mr. L. Munro Grandy, Superintendent of Schools :

I hereby submit my first Annual Report concerning the Art activities and instruction in Atkinson.

Due to the fact that there has been no previous Art Instruction Program, unusual and comprehensive results must be long in coming.

Our supplies have been limited, due to the fact that no previous provisions were made for this instruction. It is hoped that in the future we will have more equipment and supplies available. It is true in this instance that, "A man is as good as the tools he works with."

Art is essential in every-day living. One may not realize it, but it is our artistic taste that governs our mode of dressing, eating, and surroundings. It is good that at this time the need is felt to develop and guide the right artistic inclinations in your children. It will make for a better community in the future.

I wish to take this opportunity to express my appreciation for the splendid cooperation shown by the teachers in order that this program might be put across.

Respectfully submitted,

DOROTHEA S. MARTIN,

*Supervisor.*

## ANNUAL REPORT OF SCHOOL NURSE

1946-1947

---

To Mr. L. M. Grandy, Superintendent of Schools :

The following is my annual report for the year ending

December 31, 1947. As in the past, each school receives as many routine visits as possible, plus the additional visits necessary to accomplish specified work.

Number of pupils given physical examinations	71
Notifications of all defects found were sent home	
Number of visits to schools	75
Number of visits to homes—follow up work	32
Pupils given classroom inspection for Communicable Diseases	266
Pupils given individual examination for pediculosis	190
Pupils excluded for pediculosis	12
Number of pupils' vision rechecked	71
Defective vision	6
Improved or Corrected	5

1 pupil examined by Ophthalmologist showed nutritional deficiency, vitamins were ordered for a period of time, and vision was restored to normal, financed by Children's Welfare, Manchester.

1 pupil received examination by Ophthalmologist and glasses, financed by Sight Conservation Program.

Eye health in our schools is very important. Modern educational procedures depend largely on the use of sight. It is therefore necessary for all of those concerned with the welfare of the child to know as early as possible what his eye condition is. Since eyes change with growth, and accidents do occur during vacation periods of which the pupil and parent may both be unaware, periodic examinations are necessary through the school year. Ideally, every child should have a thorough medical examination, including an eye examination, before he enters school.

Enlarged Tonsils	3
Corrected	1

One Tonsilectomy and Adenoidectomy financed by Crippled Children and Handicapped Persons Fund. One pupil attended Mental Hygiene Clinic, Concord, and also had an electroencephalogram Test.

Number of pupils who have had dental corrections	9
Number of pupils having defective teeth	27

Miss Constance Martin, R.N., Staff worker of the Tuberculosis Association aided in giving the Vollmer Test for tuberculosis May 9-12, 1947 at Atkinson Academy, when eleven pupils

were tested. Two pupils reacted "Positive" to this test. Through courtesy of Mrs. Olsen transportation was furnished to Manchester Clinic for X-rays. The two that were X-rayed in Manchester Clinic, reports showed calcified glands or healed tuberculosis infection.

The Salem schools are anticipating a gift of an Audiometer, a special scientific device for measuring the hearing loss. I am looking forward to using this Audiometer and giving each pupil a hearing test. No child can learn unless he hears and understands what he hears. Many children suffer from a qualitative hearing loss, or hidden defects that no one realizes. Bright children may be stigmatized as "backward" or "lazy" when actually they are struggling under a burden of defective hearing. It has been found the majority of hard of hearing can be given auricular care he needs for correction, if found in time.

Every child was weighed and measured several times during the school year, and records kept on charts provided. Gain in weight is the best single sign of good nutrition in a child. Healthy, well-nourished children differ in many respects, according to age, sex, race, and family from which they come. They vary in body shape, and size, even at the same age; some will be slender and tall, some stocky and short. The gain to be expected over any period depends upon such factors as these, as well as the child's health through the period.

Everyday factors favorable to growth are long hours of sleep, play and exercise in open air, and a diet that includes a generous amount of milk, fruit, and vegetables.

I would like to take this opportunity to thank the School Committee, Mr. Grandy, and Teachers, and all with whom I have worked, for without their interest and cooperation, my work would have been quite futile.

Respectfully submitted,

## FOREST FIRE PROBLEM SERIOUS

The year 1947 was one of the worst periods of drouth and forest fire occurrence in eastern United States history. Lack of water ruined crops, lowered water levels and dried up brooks everywhere. Three months of deficient rainfall and abnormally high temperatures resulted in many fires which were mostly well controlled and kept within bounds. Only the high winds beginning on October 23rd caused a few fires to escape beyond immediate control. These few fires resulted in burning some 15,000 acres and the loss of 63 or more buildings in four New Hampshire towns.

All October fires were costly. They burned deeply in the ground and required day and night patrol of large crews of men until the rains came late in October. Towns which escaped from serious fires might easily have been in the midst of the most serious conflagrations we had.

Governor Dale closed the woods effective at midnight of October 15th. With the blow-up of October 23rd, a second proclamation closed all back roads and authorized towns to inaugurate patrol. The effect of this was to cut down subsequent fires for the rest of the dry period.

Local fire warden forces performed an admirable job to hold the more than 200 fires that occurred during this October period. Many men were taxed to the utmost as the emergency continued. To them and all those who did their work, the people of New Hampshire owe a debt of gratitude. The state forest fire control agency based on local town wardens and town crews wherever adequately equipped rose to the occasion and met the test in whatever town their services were needed.

It is now time to take stock everywhere of our fire fighting facilities for the season ahead and to make them adequate where necessary. To this end town fire plans and training programs for wardens, deputies and other key men in each district are being arranged or in progress. If equipment and tools are insufficient properly to equip the available man power in each community with the right tools for the job, they should be provided for at once. The yearly addition of fire tools to the town supply will generally need to be built up. The state sells tools to the towns and shares one-half their cost. Good equipment is important and can help greatly to keep both damage and fire costs at a minimum.

For many years we have requested our wardens not to issue burning permits except on rainy days. This regulation will be in effect again this year as it is one of the best means of assuring such fires from getting out of control. Nine out of every ten fires can be prevented, 98 percent of all fires being due to human carelessness. Be sure to get a permit for any fire in or near woodland when the ground is free from snow. Be sure your fires are always out before you leave them. Help us in getting the travelling public to keep from throwing out lighted matches or cigarettes. Be careful of all fires in or near woodland.

MERTON A. WEBBER, District Chief.
